## AUTO FLIP FLOP STACKER 全自動翻紙收紙機

### MACHINE LAYOUT 設備示意圖：

### SPECIFICATION 機械規格

MODEL	ASC-1412EH	ASC-1414EH	ASC-1614EH
MAX SHEET SIZE (MM)	1450*1200	1450*1450	1650*1450
MIN SHEET SIZE (MM) (W*L)	500*500	500*500	500*500
MAX PILE HEIGHT (MM)	1700 (Pallet Included)	1700 (Pallet Included)	1700 (Pallet Included)
BUNDLE CAPACITY (PER HOUR)	320	320	320
BUNDEL MAX THICKNESS(MM)	100	100	100
(Depend material)			
PRODUCTION CAPACITY (SHEET/HOUR)	8000	8000	8000

※MACHINE PRODUCTION SPEED DEPEND PAPER QUALITY AND THICKNESS. 操作速度依紙張品質情況而定。  
 ※THIS CATALOG FOR REFERENCE ONLY, SPECIFICATION SUBJECTS CHANGE WITHOUT NOTICE. 目錄僅供參考，規格變化不另行通知。  
 ※MODEL C Stand for delivery sheet flow direction. V Stand for side delivery. 型號尾碼 C代表直出 V代表側出。

代理商 AGENT

AERIAL COMPACT is universal Flip Flop Stacker that is compatible to any Brand of Flute Laminator in the world. The machine working independently adopt existing Compress Belt without any modification remains horizontal without pit for Stacker that no need any signal or rely transmission from Laminator side. The principle of machine in function one Sheet Bundle turnover and next one Sheet Bundle go through to Stacking; also incorporates “invert all” or straight thru” possibility. The advantage of Sheet Bundle inverts and elevates to Stacker in one sequence to saving the working space. It demands for anti-paper curve problem.

### AUTO FLIP FLOP STACKER

### 全自動翻紙收紙機

本公司全自動翻紙收紙機可以適用於市面上各廠牌的裱紙機。翻紙機可以與現存各廠牌裱紙機的壓紙台連結運作，運作時並不需要連接裱紙機的傳動或是任何的訊號。本機主要的功能在於交替一疊紙張翻轉，另一疊紙張不翻轉的動作，並將整疊紙張傳送至收紙台；本機器另外也具有每一疊都翻轉或是每一疊都不翻轉的功能。本機具備之垂直翻轉堆疊效能，不但可以節省翻紙機運轉時所需的工作空間，更重要的是可以解決貼合後紙張反曲或彎翹等問題。

#### BUNDLE EJECTOR

##### 貼合後整疊紙張送出

This section direct linking Laminator existing Compress Belt and it is synchronized speed. Sensor counting bundle quantity with Buffer Non-stop Device due to counting ejecting for complete a Bundle for turning converting.

本機構直接與市面上現有的貼合機相容，於輸送帶將貼合後的紙張壓著後整疊送出至本機構。透過電眼感應，計算進紙數量後將整疊紙張堆疊之後送至下一個階段進行翻轉。

#### FLIP FLOP

##### 紙張堆疊翻轉

Once time pass the bundle sheets. Next time the reverse bundle sheet to turnover; both elevating to top of Stacker for rich stacking. Also available option for operator wants one side stacking sheet bundle on pallet, this unit can be controlled; it coordinate with Advance Pushing Kicker move the bundle sheet to Stacker unit.

前方堆疊貼合的紙張之後，透過先進的推爪將整疊紙張，以一疊翻轉另一疊直接送入交叉作用的方式，垂直上升送至下一個堆疊紙台，增加翻紙的效率。

#### PALLET STACKER

##### 底紙送紙部

Due to Bundle Sheet reach stacker with double jogger to control the well stacking, non-stop device is available. Pallet stacking up to 1.7m height.

整疊紙張送到此機構後，同時透過位於兩側的拍紙機構拍齊後，堆疊至棧板上達到一點七米的高度後自動送出。已堆疊紙張的整疊棧板送出的同時，前方可以不停機繼續動作。

#### AUTO PALLET

##### 自動補充棧板

Auto pallet system included, universal pallet should base on wood board. Due to full pallet come down to floor, empty pallet push forward to standby position. Empty pallet raise again.

本機配備有自動補充棧板系統，放置備用的標準規格木棧板待命。堆疊紙張滿載會自動下降並推送到待命運送處。自動棧板會自動補充空棧板到定位。
